EDUCATION

University of Washington, Redmond (Microsoft Campus)

Expected Mar 2027

M.S. in Technology Innovation (Human-Computer Interaction)

Hunan University of Technology

Sep 2021 - Jun 2025

B.Eng. in Industrial Design

WORK EXPERIENCE

Cisco, UX Design Intern - San Jose, CA

Jun 2026 - Sep 2026

- Led end-to-end UX for AI-powered compute operations experiences in Cisco Intersight, bringing intelligence and automation into complex infrastructure workflows.
- Designed scalable, state-driven interaction patterns that turn fragmented operational data into contextual insights and relevant next actions, validated through functional prototypes with real product APIs and AI capabilities.
- Partnered closely with PMs, engineers, and domain experts to synthesize user needs, product requirements, and technical constraints into a focused design strategy and scalable product direction.

Bosch, UX Design Intern

Jan 2025 - Jul 2025

- Led end-to-end redesign of a financial reconciliation system across 8 Asia-Pacific markets, partnering closely with product managers, frontend and backend engineers to define end-to-end workflows, data logic, and system states, improving process efficiency by 82% and reducing manual workload by 53% through 10+ stakeholder interviews and cross-functional design workshops.
- Conducted and synthesized 40+ UX pain points from cross-region user interviews and stakeholder sessions, translating research insights into S/4HANA enterprise workflow optimizations that improved task clarity and reduced onboarding time by 27.8%.
- Designed Bosch's 2025 Shanghai Auto Show booth identity and digital touchpoints, collaborating with design, marketing, and engineering teams; supported 500K+ visitors, generated 10+ client orders, and contributed to approximately €300K in on-site business opportunities.

ByteDance, UI Design Intern

Jan 2024 - May 2024

- Led UX/UI design of ByteDance's internal Robot Management System (RMS), delivering a pixel-perfect homepage v1.0 from 0 to 1, and built interaction logic and high-fidelity prototypes to validate real-time monitoring workflows for 100+ warehouse robots, reducing task dispatch delay by 42% and improving operational transparency.
- Worked closely with product managers, frontend and backend engineers, AI, logistics, and operations teams to define system architecture, core workflows, and user roles; conducted usability testing to improve navigation steps, achieving 18% higher task efficiency and 25% fewer navigation steps.
- Built a modular RMS design system with 60+ reusable components and pixel-level icon design, including animated icons, improving visual consistency and design-to-development handoff efficiency by 35%.

YHLO Biotech Co., Ltd., UX Designer

Oct 2023 - Jan 2024

- Redesigned YHLO's iTLA automated sample processing system with precise UI states, iconography, and interaction feedback, improving workflow efficiency by 46%.
- Collaborated with biomedical engineers and lab technicians to validate usability, accessibility, and regulatory safety requirements, contributing to the project receiving the Muse Design Award (Gold, 2024).

Shenzhen Shidaizhongke Technology Co., Ltd., UI Designer

Jul 2023 - Oct 2023

- Redesigned the carbon footprint module and brand visual system using 2.5D and motion design, creating a cohesive and emotionally engaging interface that boosted interactivity by 22% and enabled a successful App Store relaunch.

SKILLS

- **Tools:** Figma, Miro, Photoshop, Illustrator, After Effects, Generative AI Tools, ProtoPie, Procreate, Adobe XD
- **Design:** UX/UI Design, Motion Design, Animated UI & Icon Design, Pixel-level Icon Design, Iconography, Design Systems, Information Architecture, Prototyping, Branding, Enterprise & B2B Systems, 3D Modeling & Rendering
- **Programming:** C / C++ (basic UI logic & interaction behaviors), Python (rapid prototyping), Webflow (web interactions)
- **Research:** User Interviews, Usability Testing, Journey Mapping, Persona Development, Insights Synthesis, UX Workshops

AWARDS & PUBLICATION

Muse Design Awards, **Gold Winner (Jun 2024)**

CADA Japan Concept Art Design Award, **Bronze (Sep 2023)**

Research Paper: "Study on the Application and Trend of Degradable Material Polylactic Acid (PLA) in Household Products," Key Project of Scientific Research of Hunan Provincial Department of Education (**22A0424, Oct 2023**)
